Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the unaudited annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the unaudited annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period that ended. The external auditors are engaged to express an independent opinion on the unaudited annual financial statements and was given unrestricted access to all financial records and related data.

The unaudited annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The unaudited annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the unaudited annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2015 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

The unaudited annual financial statements set out on page 6 - 96, which have been prepared on the going concern basis, were approved by the accounting officer and were signed by him:

Mr. J.G. Lategan (Acting)
Municipal Manager (Accounting Officer)
Kai !Garib Local Municipality
29 August 2014

Kai !Garib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Officer's Report

The accounting officer submits his report for the year ended 30 June 2014.

1. Review of activities

Main business and operations

Kai !Garib Municipality is a local municipality performing functions as set out in the Constitution (Act no 105 of 1996) and operates principally in South Africa.

The operating results and state of affairs of the municipality are fully set out in the attached unaudited annual financial statements and do not in our opinion require any further comment.

Net deficit of the municipality was R 42 771 742 (2013: deficit R 31 671 476).

2. Going concern

The unaudited annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

3. Subsequent events

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year.

4. Accounting Officer's interest in contracts

The account officer has no interest in contracts awarded, either direct or indirect.

5. Accounting policies

The unaudited annual financial statements have been prepared in accordance with the Municipal Finance Management Act (MFMA) and effective standards of Generally Recognised Accounting Practices (GRAP), including any interpretations and directives issued by the Accounting Standards Board (ASB) in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

Accounting policies for material transactions, events or conditions not covered by the GRAP reporting framework, have been developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 (Revised – March 2012) and the hierarchy approved in Directive 5 issued by the Accounting Standards Board.

6. Accounting Officer

The accounting officer of the municipality during the year and to the date of this report is as follows:

Name	Changes
Mr. J.G. Lategan (Acting)	Appointed 01 April 2014
Mr. A. Vosloo	Resigned 31 March 2014

Kai !Garib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Officer's Report

7. Corporate governance

General

The accounting officer is committed to business integrity, transparency and professionalism in all its activities. As part of this commitment, the accounting officer supports the highest standards of corporate governance and the ongoing development of best practice.

The municipality confirms and acknowledges its responsibility to total compliance with the Code of Corporate Practices and Conduct ("the Code") laid out in the King III Report on Corporate Governance for South Africa 2010. The accounting officer discuss the responsibilities of management in this respect, at council meetings and monitor the municipality's compliance with the code on a three monthly basis.

The salient features of the municipality's adoption of the Code is outlined below:

Audit committee

The audit committee was established with effect from 1 July 2014. The chairperson of the audit committee is Mr. H.C. Ogu (non executive director), who is an independent audit committee member. Other independent members of the audit committee are, Mr. N. Erasmus and Me. A. Viljoen.

Internal audit

The municipality established an internal audit unit on 1 April 2014. Since the establishment of the internal audit unit ZF Mgcawu District Municipality assists the municipality with their internal audit functions as required by legislation.

8. Bankers

The municipality's primary bank accounts are with ABSA Bank Limited and Standard Bank Limited and will continue to bank with them in the new financial year.

9. Auditors

Auditor General of South Africa will continue in office for the next financial period.

Accounting Policies

1. Presentation of Unaudited Annual Financial Statements

The unaudited annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These unaudited annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied, except where otherwise indicated, in the preparation of these unaudited annual financial statements, are disclosed below.

For the years ended 30 June 2013 and 30 June 2014 the municipality has adopted the accounting framework as set out above. The details of any resulting changes in accounting policy and comparative restatements are set out below.

The municipality changes an accounting policy only if the following instances:

- is required by a Standard of GRAP; or
- results in the financial statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the entity's financial position, financial performance or cash flow.

1.1 Presentation currency

These unaudited annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

The amounts disclosed in the unaudited annual financial statements are rounded-off to the nearest Rand.

1.2 Going concern assumption

These unaudited annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Significant judgements and sources of estimation uncertainty

In preparing the unaudited annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the unaudited annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the unaudited annual financial statements. Significant judgements include:

Trade receivables / Held to maturity investments and/or loans and receivables

The municipality assesses its trade receivables and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

Allowance for slow moving, damaged and obsolete stock

An allowance for stock to write stock down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the operation surplus note.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Fair value estimation

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 14 - Provisions.

Useful lives and residual values of property, plant and equipment and other assets

The municipality reassesses the useful lives and residual values of property, plant and equipment, investment property and intangible assets on an annual basis. In reassessing the useful lives and residual values of property, plant and equipment, investment property and intangible assets management considers the condition and use of the individual assets, and base it on industry knowledge, to determine the remaining period over which the asset can and will be used and the residual value.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 7.

Effective interest rate

The municipality uses an appropriate interest rate, taking into account guidance provided in the accounting standards, and applying professional judgement to the specific circumstances, to discount future cash flows.

Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

1.4 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.4 Investment property (continued)

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Cost model

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Land	Indefinite
Buildings	50 Years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

When classification is difficult, the criteria used to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of operations, are as follows:

- Property intended for sale in the ordinary course of operations or in the process of construction or development from such sale;
- Property being constructed or developed on behalf of third parties;
- Owner occupied property, including among other things property held for future use as owner occupied property, property held for future developments and subsequent use as owner occupied property, property occupied by employees such as housing personnel (whether or not the employees pay rent at market rates) and owner occupied property awaiting disposal;
- Property that is being constructed for future use as investment property;
- Property that is leased to another entity as investment property;
- Property held to provide a social service and which also generates cash inflows, e.g. property rented out below market rental to sporting bodies, schools, low income families, etc; and
- Property held for strategic purposes or service delivery.

1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one reporting period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost or fair value of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.5 Property, plant and equipment (continued)

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site in which it is located.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or assets, or a combination of assets and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for land and buildings which is carried at revalued amount being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus included in net assets related to a specific item of property, plant and equipment is transferred directly to accumulated surplus or deficit when the asset is derecognised.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Depreciation only commences when the asset is ready for its intended use.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life
Land	Indefinite
Buildings	10-50 years
Plant and machinery	2-80 years
Furniture and fixtures	3-15 years
Motor vehicles	3-15 years
Computer equipment	2-5 years
Infrastructure	5-60 years

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.5 Property, plant and equipment (continued)

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use or disposal of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

1.6 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.7 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.7 Intangible assets (continued)

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software, other	2 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

Capitalised development costs are recorded as intangible assets and recognised from the point at which the asset is ready for use on a straight line basis over its useful life, which is between 3 and 5 years. Where intangible assets are deemed to have an indefinite useful life, such intangible assets are not amortised, for example servitude's obtained by the municipality give the municipality access to land for specific purposes for an unlimited period. However, such intangible assets are subject to an annual impairment test.

Development assets are tested for impairment annually in accordance with GRAP 102. The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

1.8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one municipality and a financial liability or a residual interest of another municipality.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an municipality on terms that are not market related.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an municipality's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an municipality shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the municipality shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another municipality; or
- a contractual right to:
 - receive cash or another financial asset from another municipality; or
 - exchange financial assets or financial liabilities with another municipality under conditions that are potentially favourable to the municipality.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another municipality; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the municipality.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an municipality in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the municipality had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the municipality designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Cash and cash equivalents
Consumer debtors
Other financial asset

Category

Financial asset measured at amortised cost
Financial asset measured at amortised cost
Financial asset measured at fair value

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Consumer deposits
Finance lease obligations
Other financial liabilities (DBSA)
Trade and other payables from exchange transactions
Unspent conditional grants

Category

Financial liability measured at amortised cost
Financial liability measured at amortised cost
Financial liability measured at amortised cost
Financial liability measured at amortised cost
Financial liability measured at amortised cost

Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

The municipality recognises financial assets using trade date accounting.

Kai !Garib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Impairment and uncollectibility of financial assets

The municipality assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Derecognition

Financial assets

The municipality derecognises financial assets using trade date accounting.

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If a transfer does not result in derecognition because the municipality has retained substantially all the risks and rewards of ownership of the transferred asset, the municipality continue to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the municipality recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

The municipality recognises the difference between the carrying amount of the financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, in the statement of financial performance.

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.9 Investments

Where the carrying amount of an investment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the statement of financial performance

- Investments in securities

Investments in securities are recognised on a trade date basis and are initially measured at cost.

At subsequent reporting dates, debt securities that the municipality has the expressed intention and ability to hold to maturity (held-to-maturity debt securities) are measured at amortised cost, less any impairment losses recognised to reflect irrecoverable amounts. The annual amortisation of any discount or premium on the acquisition of a held-to-maturity security is aggregated with over investment income receivable over the term of the instrument so that the revenue recognised in each period represents a constant yield on the investment.

Investments other than held-to-maturity debt securities are classified as either held for trading or available-for-sale, and are measured at subsequent reporting dates at fair value, based on quoted market prices at the reporting date. Where securities are held for trading purposes, unrealised gains and losses are included in net surplus/(deficit) for the period. For available-for-sale investments, unrealised gains and losses are recognised directly in net assets, until the security is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognised in net assets is included in the net surplus/(deficit) for the period.

- Investments in derivative financial instruments

Derivative financial instruments are initially recorded at cost and are remeasured to fair value at subsequent reporting dates.

Changes in the fair value of derivative financial instruments that are designated and effective as cash flow hedges are recognised directly in accumulated surpluses/(deficits). Amounts deferred in net assets are recognised in the statement of financial performance in the same period in which the hedged firm commitment or forecasted transaction affects net surplus/(deficit).

Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in the statement of financial performance as they arise.

1.10 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.10 Leases (continued)

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.11 Decrease/(Increase) in Inventories

Decrease/(Increase) in Inventories are initially measured at cost except where decrease/(increase) in inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently decrease/(increase) in inventories are measured at the lower of cost and net realisable value.

Decrease/(Increase) in Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of decrease/(increase) in inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of decrease/(increase) in inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all decrease/(increase) in inventories having a similar nature and use to the municipality.

When decrease/(increase) in inventories are sold, the carrying amounts of those decrease/(increase) in inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of decrease/(increase) in inventories to net realisable value or current replacement cost and all losses of decrease/(increase) in inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of decrease/(increase) in inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of decrease/(increase) in inventories recognised as an expense in the period in which the reversal occurs.

1.12 Consumer deposits

Consumer deposits are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

1.13 Value added tax (VAT)

The municipality accounts for value added tax on the cash basis. The municipality is liable to account for VAT at the standard rate (14%) in terms of section 7(1)(a) of the VAT Act in respect of the supply of goods or services except where the suppliers are specifically zero rated in terms of section 11, exempt in terms of section 12 of the VAT Act or are scoped out for VAT purposes.

The municipality accounts for VAT on a monthly basis.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.14 Unspent conditional grants

Unspent conditional grants are financial liabilities that are separately reflected on the Statement of Financial Position. They represent unspent government grants, subsidies and contributions from the public.

Government grants and receipts are recognised as revenue when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- The amount of the revenue can be measured reliably; and
- To the extent that there has been compliance with any restrictions associated with the grant.

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met, a liability is recognised.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs, are recognised in the statement of financial performance in the period in which they become receivable.

Interest earned on investments is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest, it is recognised as interest earned in the statement of financial performance.

1.15 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish cash-generating assets from non-cash-generating assets are as follows:

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.15 Impairment of cash-generating assets (continued)

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Basis for estimates of future cash flows

In measuring value in use the municipality:

- base cash flow projections on reasonable and supportable assumptions that represent management's best estimate of the range of economic conditions that will exist over the remaining useful life of the asset. Greater weight is given to external evidence;
- base cash flow projections on the most recent approved financial budgets/forecasts, but excludes any estimated future cash inflows or outflows expected to arise from future restructuring's or from improving or enhancing the asset's performance. Projections based on these budgets/forecasts covers a maximum period of five years, unless a longer period can be justified; and
- estimate cash flow projections beyond the period covered by the most recent budgets/forecasts by extrapolating the projections based on the budgets/forecasts using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. This growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used, unless a higher rate can be justified.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.15 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.16 Employee benefits

Employee benefits are all forms of consideration given by an municipality in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting municipality, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting municipality's own creditors (even in liquidation) and cannot be paid to the reporting municipality, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting municipality to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an municipality's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.16 Employee benefits (continued)

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an municipality's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the municipality has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cell phones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognise the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Accounting Policies

1.16 Employee benefits (continued)

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an municipality provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Remuneration to employees is recognised in the statement of financial performance as the services are rendered, except for non-accumulating benefits which are only recognised when the specific event occurs.

The municipality has opted to treat its provision for leave pay as an accrual.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service. The liability for leave pay is based on the total accrued leave days at year end and is shown as a provision in the statement of financial position. The municipality recognises the expected cost of performance bonuses only when the municipality has a present legal or constructive obligation to make such payment and a reliable estimate can be made.

The municipality provides retirement benefits for its employees and councillors, and has both defined benefit and defined contribution post employment plans.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

1.16 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the municipality recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The municipality measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Post-retirement health care benefits

The municipality has an obligation to provide post-retirement health care benefits to certain of its retirees. According to the rules of the medical aid funds with which the municipality is associated, a member (who is on the current conditions of service), on retirement, is entitled to remain a continued member of the medical aid fund, in which case the municipality is liable for a certain portion of the medical aid membership fee. Not all medical aid funds, with which the municipality is associated, provide for continued membership.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.16 Employee benefits (continued)

The defined benefit liability is the aggregate of the present value of the defined benefit obligation and unrecognised actuarial gains and losses, reduced by unrecognised past service costs. The plan is unfunded. The present value of the defined benefit obligation is calculated using the projected unit credit method, incorporating actuarial assumptions and a discount rate based on the government bond rate. Valuations of these obligations are carried out every year by independent qualified actuaries.

Actuarial gains or losses are accounted for using the corridor method. Actuarial gains and losses are eligible for recognition in the statement of financial performance to the extent that they exceed 10 per cent of the present value of the gross defined benefit obligations in the scheme at the end of the previous reporting period. Actuarial gains and losses exceeding 10 per cent are spread over the expected average remaining working lives of the employees participating in the scheme.

Past-service costs are recognised immediately in income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

Provincially-administered defined benefit plans

The municipality contributes to various national and provincial-administered defined benefit plans on behalf of its qualifying employees. These funds are multi-employer funds. The contributions to fund obligations for the payment of retirement benefits are charged against revenue in the year they become payable. These defined benefit funds are actuarially valued triennially on the projected unit credit method basis. Deficits are recovered through lump sum payments or increased future contributions on a proportional basis from all participating municipalities.

Defined benefit pension plans

The municipality has an obligation to provide post-retirement pension benefits to certain of its retirees. Pension contributions in respect of employees who were not members of a pension fund are recognised as an expense when incurred. Staff provident funds are maintained to accommodate personnel who, due to age, cannot join or be part of the various pension funds. The municipality contributes monthly to the funds.

The liability recognised in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets, together with adjustments for unrecognised past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Actuarial gains or losses are accounted for using the corridor method. Actuarial gains and losses are eligible for recognition in the statement of financial performance to the extent that they exceed 10 per cent of the present value of the gross defined benefit obligations in the scheme at the end of the previous reporting period. Actuarial gains and losses exceeding 10 per cent are spread over the expected average remaining working lives of the employees participating in the scheme.

Past-service costs are recognised immediately in income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

Other post retirement obligations

Long-service allowance

The municipality has an obligation to provide long-service allowance benefits to all of its employees. According to the rules of the long-service allowance scheme, which the municipality instituted and operates, an employee (who is on the current conditions of service), is entitled to a cash allowance, calculated in terms of the rules of the scheme, after 10, 15, 20, 25 and 30 years of continued service. The municipality's liability is based on an actuarial valuation. The projected unit credit method is used to value the liabilities. Actuarial gains and losses on the long-term incentives are accounted for through the statement of financial performance.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.17 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

A provision is used only for expenditures for which the provision was originally recognised.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 44.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.17 Provisions and contingencies (continued)

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, the municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present under an onerous contract is recognised and measured as a provision. An onerous contract is a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it – this unavoidable cost resulting from the contract is the amount of the provision to be recognised.

Provisions are reviewed at reporting date and the amount of a provision is the present value of the expenditure expected to be required to settle the obligation. When the effect of discounting is material, provisions are determined by discounting the expected future cash flows that reflect current market assessments of the time value of money. The impact of the periodic unwinding of the discount is recognised in the statement of financial performance as a finance cost as it occurs.

Landfill Rehabilitation Provision

The Landfill Rehabilitation Provision is created for the rehabilitation of the current operational sites at the future estimated time of closure.

The value of the Provision is based on the expected future cost to rehabilitate the various sites discounted back to the balance sheet date at the cost of capital.

The municipality has an obligation to rehabilitate these Landfill sites. The cost of such property includes the initial estimate of the costs of rehabilitating the land and restoring the site on which it is located, the obligation for which the municipality incurs as a consequence of having used the property during a particular period for landfill purposes. The municipality estimates the useful lives and makes assumptions as to the useful lives of these assets, which influence the provision for future costs.

The asset is measured using the cost model:

- changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- if the adjustment results in an addition to the cost of an asset, the economic entity considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount, and any impairment loss is recognised in surplus or deficit.

1.18 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.18 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by the proportion that costs incurred to date bear to the total estimated costs of the transaction.

Interest and investment income

Revenue arising from the use by others of municipality assets yielding interest or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised in surplus or deficit, using the effective interest rate method.

Interest earned on investments is recognised in the statement of financial performance on the time-proportionate basis that takes into account the effective yield on the investment.

Interest earned on the following investments is not recognised in the statement of financial performance:

- Interest earned on trust funds is allocated directly to the fund.
- Interest earned on unspent conditional grants is allocated directly to the creditor: unspent conditional grants, if the grant conditions indicate that interest is payable to the funder.

Service charges

Service charges are levied in terms of approved tariffs. Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without it being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the type of service and the number of sewer connections on all developed property and water consumption, using the tariffs approved by council, and are levied monthly.

In circumstances where services cannot readily be measured and quantified, a flat rate service charge is levied monthly on such properties.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.18 Revenue from exchange transactions (continued)

Pre-paid electricity

Revenue from the sale of electricity prepaid meter cards are recognised at the point of sale. Revenue from the sale of electricity prepaid meter cards made seven days before year-end are recognised based on an estimate of the prepaid electricity consumed as at the reporting date.

Rentals received

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods;
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

1.19 Revenue from non-exchange transactions

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than property rates.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting municipality.

Grants, Transfers and Donations

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

1.20 Revenue

Turnover comprises of sales to consumers and service rendered to consumers. Revenue is stated at the invoice amount and is exclusive of value added taxation.

Kai !Garib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.21 Borrowing costs

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.22 Treatment of administration and other overhead expenses

The costs of internal support services are transferred to the various services and departments to whom resources are made available.

1.23 Comparative figures

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are reclassified. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.24 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.25 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.26 Irregular expenditure

Irregular expenditure as defined in section 1 of the MFMA states the following "Irregular expenditure in relation to a municipality or municipal entity ,means:

- Expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with ,a requirement of this Act and which has not been condoned in terms of section 170
- Expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with ,a requirement of the Municipal Systems Act and which has not been condoned in terms of this Act
- Expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with ,a requirement of the Public Office-Bearers Act 1998 (Act No 20 of 1998) or
- Expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with ,a requirement of the supply chain management policy of the municipality or entity or any of the municipality's by –laws giving effect to such policy and which has not been condoned in terms of such policy or by-law

But excludes expenditure by a municipality which falls within the definition of "unauthorised expenditure.

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.26 Irregular expenditure (continued)

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.27 Revaluation reserve

The surplus arising from the revaluation of property, plant and equipment is credited to a non-distributable reserve. The revaluation surplus is realised as revalued buildings are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the statement of financial performance.

1.28 Research and development expenditure

Expenditure on research is recognised as an expense when it is incurred.

An asset arising from development is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

1.29 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisation's (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2013-07-01 to 2014-06-30.

Kai !Garib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.29 Budget information (continued)

The unaudited annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.30 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Key management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.31 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

1.32 Events after reporting date

Events after the reporting date that are classified as adjusting events have been accounted for in the annual financial statements. The events after the reporting date that are classified as non-adjusting events after the reporting date have been disclosed in notes to the annual financial statements.

1.33 Commitments

Commitments are not recognised in the statement of financial position as a liability or as expenditure in the statement of financial performance, but are included in the disclosure notes. A distinction is made between capital and current commitments.

Commitments are disclosed for:

- Approved and contracted commitments, where the expenditure has been approved and the contract has been awarded at the reporting date.
- Approved but not yet contracted commitments, where the expenditure has been approved and the contract has yet to be awarded or is awaiting finalisation at the reporting date.
- Items are classified as commitments where the municipality commits itself to future transactions that will normally result in the outflow of resources.
- Contracts that are entered into before the reporting date, but goods and services have not yet been received are disclosed in the disclosure notes to the financial statements.
- Other commitments for contracts are be non-cancelable or only cancelable at significant cost contracts should relate to something other than the business of the municipality.

Unaudited Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.34 Change on accounting policies estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality restated the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

The municipality identified and disclosed the impact of GRAP standards that have been issued but are not yet effective in accordance with the requirements of GRAP 3.

-----------------	------	------

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

GRAP 25: Employee benefits

The objective of GRAP25 is to prescribe the accounting and disclosure for employee benefits. The Standard requires an municipality to recognise: Irregular expenditure as result of the Noncompliance with SCM regulations and policies

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when an municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

GRAP25 must be applied by an employer in accounting for all employee benefits, except share based payment transactions.

GRAP25 defines, amongst others, the following:

- Employee benefits as all forms of consideration given by an municipality in exchange for service rendered by employees;
- Defined contribution plans as post-employment benefit plans under which an municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods;
- Defined benefit plans as post-employment benefit plans other than defined contribution plans;
- Multi-employer plans as defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that:
 - pool the assets contributed by various entities that are not under common control; and
 - use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the municipality that employs the employees concerned;
- Other long-term employee benefits as employee benefits (other than post-employment benefits and termination benefits) that is not due to be settled within twelve months after the end of the period in which the employees render the related service;
- Post-employment benefits as employee benefits (other than termination benefits) which are payable after the completion of employment;
- Post-employment benefit plans as formal or informal arrangements under which an municipality provides post-employment benefits for one or more employees;
- Short-term employee benefits as employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service;
- State plans as plans other than composite social security programmes established by legislation which operate as if they are multi-employer plans for all entities in economic categories laid down in legislation;
- Termination benefits as employee benefits payable as a result of either:
 - an entity's decision to terminate an employee's employment before the normal retirement date; or
 - an employee's decision to accept voluntary redundancy in exchange for those benefits;
- Vested employee benefits as employee benefits that are not conditional on future employment.

The standard states the recognition, measurement and disclosure requirements of:

- Short-term employee benefits;
 - All short-term employee benefits;
 - Short-term compensated absences;
 - Bonus, incentive and performance related payments;
- Post-employment benefits: Defined contribution plans;
- Other long-term employee benefits;
- Termination benefits.

Notes to the Unaudited Annual Financial Statements

2. New standards and interpretations (continued)

The standard states Post-employment benefits: Distinction between defined contribution plans and defined benefit plans:

- Multi-employer plans;
- Defined benefit plans where the participating entities are under common control;
- State plans;
- Composite social security programmes;
- Insured benefits.

The standard states, for Post-employment benefits: Defined benefit plans, the following requirements:

- Recognition and measurement;
- Presentation;
- Disclosure;
- Accounting for the constructive obligation;
- Statement of financial position;
- Asset recognition ceiling;
- Asset recognition ceiling: When a minimum funding requirement may give rise to a liability;
- Statement of financial performance.

The standard prescribes recognition and measurement for:

- Present value of defined benefit obligations and current service cost:
 - Actuarial valuation method;
 - Attributing benefits to periods of service;
 - Actuarial assumptions;
 - Actuarial assumptions: Discount rate;
 - Actuarial assumptions: Salaries, benefits and medical costs;
 - Actuarial gains and losses;
 - Past service cost.
- Plan assets:
 - Fair value of plan assets;
 - Reimbursements;
 - Return on plan assets.

The standard also deals with Entity combinations and Curtailments and settlements.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality has adopted the standard for the first time in the 2014 unaudited annual financial statements.

The impact of the standard is set out in note 1.34 Changes in Accounting Policy.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Notes to the Unaudited Annual Financial Statements

2. New standards and interpretations (continued)

GRAP 1 (as revised 2012): Presentation of Financial Statements

Paragraphs .108 and .109 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to the Statement of Financial Performance as well as the Statement of Changes in Net Assets for the year ended 30 June 2014.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

The impact of the amendment is set out in note 1.34 Changes in Accounting Policy.

GRAP 3 (as revised 2012): Accounting Policies, Change in Accounting Estimates and Errors

Paragraphs .17 and .18 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Changes in Accounting Policies.

The effective date of the amendment is for years beginning on or after 01 April 2013

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

The impact of the amendment is set out in note 1.34 Changes in Accounting Policy.

GRAP 9 (as revised 2012): Revenue from Exchange Transactions

Paragraphs .11 and .13 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to the Scope and Definitions.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

The impact of the amendment is set out in note 1.34 Changes in Accounting Policy.

GRAP 12 (as revised 2012): Inventories

Paragraph .30 was amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Measurement after recognition.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

The impact of the amendment is set out in note 1.34 Changes in Accounting Policy.

Kai !Garib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Notes to the Unaudited Annual Financial Statements

2. New standards and interpretations (continued)

GRAP 13 (as revised 2012): Leases

Paragraphs .38 and .42 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Disclosures.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

The impact of the amendment is not material.

GRAP 16 (as revised 2012): Investment Property

Paragraphs .12, .15, .34, .76, .84 and .87 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Definitions, Measurement at recognition, Disposals and Disclosure.

All amendments to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

The impact of the amendment is set out in note 1.34 Changes in Accounting Policy.

GRAP 17 (as revised 2012): Property, Plant and Equipment

Paragraphs .44, .45, .72, .75, .79 and .85 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Measurement after recognition, Derecognition and Disclosure.

All amendments to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

The impact of the amendment is set out in note 1.34 Changes in Accounting Policy.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Notes to the Unaudited Annual Financial Statements

2. New standards and interpretations (continued)

GRAP 31 (as revised 2012): Intangible Assets (Replaces GRAP 102)

Numerous paragraphs were amended by the improvements to the Standards of GRAP issued previously:

Changes made comprise 3 areas that can be summarised as follows:

- Consequential amendments arising from the alignment of the accounting treatment and text of GRAP 102 with that in IPSAS 31,
- The deletion of guidance and examples from Interpretations issues by the IASB previously included in GRAP102,
- Changes to ensure consistency between the Standards, or to clarify existing principles.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's unaudited annual financial statements.

IGRAP16: Intangible assets website costs

An entity may incur internal expenditure on the development and operation of its own website for internal or external access. A website designed for external access may be used for various purposes such as to disseminate information, for example annual reports and budgets, create awareness of services, request comment on draft legislation, promote and advertise an entity's own services and products, for example the E-filing facility of SARS that enables taxpayers to complete their annual tax assessments, provide electronic services and list approved supplier details. A website designed for internal access may be used to store an entity's information, for example policies and operating procedures, and details of users of a service, and other relevant information.

The stages of a website's development can be described as follows:

- Planning – includes undertaking feasibility studies, defining objectives and specifications, evaluating alternatives and selecting preferences.
- Application and infrastructure development – includes obtaining a domain name, purchasing and developing hardware and operating software, installing developed applications and stress testing.
- Graphical design development – includes designing the appearance of web pages.
- Content development – includes creating, purchasing, preparing and uploading information, either text or graphic, on the website before the completion of the website's development. This information may either be stored in separate databases that are integrated into (or accessed from) the website or coded directly into the web pages.

Once development of a website has been completed, the operating stage begins. During this stage, an entity maintains and enhances the applications, infrastructure, graphical design and content of the website.

When accounting for internal expenditure on the development and operation of an entity's own website for internal or external access, the issues are:

- whether the website is an internally generated intangible asset that is subject to the requirements of the Standard of GRAP on Intangible Assets; and
- the appropriate accounting treatment of such expenditure.

This Interpretation of Standards of GRAP does not apply to expenditure on purchasing, developing, and operating hardware (eg web servers, staging servers, production servers and internet connections) of a website. Such expenditure is accounted for under the Standard of GRAP on Property, Plant and Equipment. Additionally, when an entity incurs expenditure on an internet service provider hosting the entity's website, the expenditure is recognised as an expense under the paragraph .93 in the Standard of GRAP on Presentation of Financial Statements and the Framework for the Preparation and Presentation of Financial Statements when the services are received.

Kai Igarib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Notes to the Unaudited Annual Financial Statements

2. New standards and interpretations (continued)

The Standard of GRAP on Intangible Assets does not apply to intangible assets held by an entity for sale in the ordinary course of operations (see the Standards of GRAP on Construction Contracts and Inventories) or leases that fall within the scope of the Standard of GRAP on Leases. Accordingly, this Interpretation of Standards of GRAP does not apply to expenditure on the development or operation of a website (or website software) for sale to another entity. When a website is leased under an operating lease, the lessor applies this Interpretation of Standards of GRAP. When a website is leased under a finance lease, the lessee applies this Interpretation of Standards of GRAP after initial recognition of the leased asset.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's unaudited annual financial statements.

IGRAP1 (as revised 2012):Applying the probability test on initial recognition of revenue

Paragraphs .03, .04, .05, .06, .08 and .10, were amended and paragraph .02 was added in the Interpretation of the Standards of GRAP.

This Interpretation of the Standards of GRAP now addresses the manner in which an entity applies the probability test on initial recognition of both:

- (a) exchange revenue in accordance with the Standard of GRAP on Revenue from Exchange Transactions and
- (b) non-exchange revenue in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

This Interpretation of the Standards of GRAP supersedes the Interpretation of the Standards of GRAP: Applying the Probability Test on Initial Recognition of Exchange Revenue issued in 2009.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's unaudited annual financial statements.

Details of valuation

The effective date of the revaluations was 14 August 2014 as per valuation report. The valuation of investment property were done to reflect the fair value of investment properties as at 30 June 2014 and 30 June 2013. Revaluations were performed by an independent valuer, Mr D van Vuuren as a Professional Associated Valuer, of DDP Valuers. DDP Valuers are not connected to the municipality and have recent experience in location and category of the investment property being valued. The valuation was based on open market value for existing use.

Investment properties comprise residential and commercial properties that are rented out, as well as vacant land held for a currently undetermined use.

There are no restrictions on the realisability of investment property or the remittance of revenue and proceeds of disposal.

7. Employee benefit obligations

Defined benefit plan

The GRAP 25 Statement sets out the measurement recognition and disclosure requirements in accounting for postretirement "defined benefit" plans. It is recommended that the Municipality consult with their auditors in determining the appropriate approach for reflecting the results of this valuation in their Financial Statements.

Post retirement benefit plan

The Municipality offers employees and continuation members the opportunity of belonging to one of several medical aid schemes, most of which offer a range of options pertaining to levels of cover.

Upon retirement, an employee may continue membership of the medical scheme. Upon a member's death-in-service or death-in-retirement, the surviving dependants may continue membership of the medical scheme.

In estimating the liability for post-employment health care benefits a number of assumptions are required. GRAP 25 Statement places the responsibility on management to set these assumptions as guided by the principles set out in the Statement and in discussion with the actuary.

It should be noted that the valuation method and assumptions do not affect the ultimate cost of the post-employment health care arrangement – this is determined by actual experience and by the benefits provided. The method and assumptions influence how the past service liability and future-service costs are recognised over time.

Notes to the Unaudited Annual Financial Statements

Figures in Rand	2014	2013
-----------------	------	------

7. Employee benefit obligations (continued)

Changes in the present value of the defined benefit obligation are as follows:

Opening balance	11 638 471	11 038 052
Net expense recognised in the statement of financial performance	2 514 267	600 419
	14 152 738	11 638 471

Net expense recognised in the statement of financial performance

Current service costs: Post employment benefits	397 202	282 992
Contributions (benefits paid)	(658 365)	(567 538)
Interest cost: Post employment benefits	987 743	837 512
Actuarial losses: Post employment benefits	1 787 687	47 453
Included in employee related costs (Note 30)	2 514 267	600 419

Calculation of actuarial gains and losses

Actuarial (gains) losses – Obligation	1 787 687	47 453
---------------------------------------	-----------	--------

Key assumptions used

Assumptions used at the reporting date:

Discount rates used	8.91 %	8.65 %
Health care cost inflation rate	8.13 %	7.70 %
Net effective discount rate	0.72 %	0.59 %

Key demographic assumptions used at the report date:

Average retirement age:	63 years
Continuation of membership at retirement:	90.00%
Proportion assumed married at retirement:	95.00%
Proportion of eligible current non-member employees joining the scheme by retirement:	
Mortality during employment:	SA 85-90
Mortality post-retirement:	PA90-1 ultimate

It is difficult to predict future investment returns and health care cost inflation rates. The relationship between them is more stable and therefore easier to predict. GRAP 25 requires that financial assumptions be based on market expectations at the Valuation Date for the period over which the liability obligations are to be settled.

Discount Rate:

GRAP 25 stipulates that the choice of this rate should be derived from high quality corporate bond yields. However, where the market in these bonds is not significant, the market yields on government bonds consistent with the estimated term of the post-employment liabilities should be used.

Consequently, a discount rate of 8.91% per annum has been used. The corresponding index-linked yield at this term is 1.67%. These rates do not reflect any adjustment for taxation. These rates were deduced from the JSE Zero Coupon bond yield after the market close on 30 June 2014.

Health Care Cost Inflation Rate:

This assumption is required to reflect estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs (for example, due to technological advances or changes in utilisation patterns). Any assumption regarding future medical scheme contribution increases is therefore subjective.

Notes to the Unaudited Annual Financial Statements

Figures in Rand	2014	2013
-----------------	------	------

7. Employee benefit obligations (continued)

A health care cost inflation rate of 8.13% has been assumed. This is 1.50% in excess of expected CPI inflation over the expected term of the liability, namely 6.63%. A larger differential would be unsustainable, eventually forcing members to less expensive options. This implies a net discount rate of 0.72% which derives from $((1+8.91\%)/(1+8.13\%))-1$.

The expected inflation assumption of 6.63% was obtained from the differential between market yields on index-linked bonds consistent with the estimated term of the liabilities (1.67%) and those of fixed interest bonds (8.91%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). This was therefore determined as follows: $((1+8.91\%-0.50\%)/(1+1.67\%))-1$.

The next contribution increase was assumed to occur with effect from 1 January 2015.

Replacement ratio:

This is the expected pension as a percentage of final salary, at retirement. This assumption is required to determine the income band at retirement of members since some contribution rate tables are income-dependent. A replacement ratio of 65% was assumed. Income bands are assumed to increase with general salary inflation and therefore an explicit salary inflation assumption is not necessary.

Current liabilities				5 598 356	620 592
				43 010 782	33 045 594

Environmental rehabilitation provision

Adjustment of unit costs:

The baseline for the unit costs used in the MLCCM was set in 2011. Unit costs are adjusted annually on 1 July. For the various cost elements relating to pre-closure planning as well as post-closure monitoring and maintenance, the 3-month average of the CPI was used to adjust the unit cost for each cost element. The unit cost of the various costs elements relating to rehabilitation and closure were adjusted using the Civil Engineering Indices and the Contract Price Adjustment Factors, using the coefficients for Earthworks as provided in the General Conditions of Contract. The price adjustment for 2014 resulting from these formulas amounted to 7.5305%.

CPI:

The CPI was used for the annual adjustment of unit costs as well as for determining the future value of current costs in the year when the cost is projected to be incurred. The CPI was obtained from Statistics SA's website. The average of the CPI for the last three months as published on 30 June 2014 (reporting date) was used for the adjustment of unit costs, as well as for the determination of future value of current costs, i.e. 6.2663%.

Discount rate:

GRAP 19 states that where the effect of the time value of money is material, the amount of the provision shall be the present value of the expenditures expected to be required to settle the obligation. In view of the long operational life of landfills, the time value of money is considered material. GRAP 19 prescribes that the discount rate shall be the pre-tax rate that reflects current market assessments of the time value of money, and the risks specific to the liability. Normally corporate bond rates are used to determine the discount rate. In line with GRAP 25 Defined benefit plans, government bond rates may also be used to determine the discount rate. Where the liability in this case is determined for a government entity (municipality), government bond rates are considered a more appropriate indicator of the risk associated with the entity than corporate bond rates to determine the discount rate. The government bond rate most consistent with the estimated term of the liability should be used. As inflation-linked RSA retail bond rates have longer terms than fixed RSA retail bond rates, inflation-linked rates are used as published on the RSA Retail Savings Bond website. The rate most consistent with the remaining life of the landfill published on 30 June 2014 was used.

Notes to the Unaudited Annual Financial Statements

Figures in Rand	2014	2013
-----------------	------	------

14. Provisions (continued)

In the case of these landfills the following rates were used:

- Kakamas, Kenhardt, Keimoes and Currieskamp landfills – the rate associated with the maximum period of 10 years, i.e. 2.25% above CPI.
- Marchand and Lennertsville landfills – the rate associated with the minimum period of 3 years, i.e. 1.00% above CPI

Long service awards provision

The municipality operates an unfunded defined benefit plan for all its employees. Under the plan, a long service award is payable after 10 years of continuous service and every 5 years thereafter, until 45 years of service (inclusive), to employees. Furthermore a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of the long-service based on historical staff turnover. No other long-service benefits are provided to employees.

15. Payables from exchange transactions

Trade payables	458 641	10 095 763
Accrual for employee bonuses	3 107 244	2 332 258

Unaudited Annual Financial Statements for the year ended 30 June 2014

Notes to the Unaudited Annual Financial Statements

Figures in Rand	2014	2013
21. Property rates		
Rates received		
Residential	34 194 501	11 130 878
Small holdings and farms	3 172 774	-
Less: Rebates	(23 049 626)	(113 429)
	14 317 649	11 017 449
Property rates - penalties imposed	3 296 798	2 825 349
	17 614 447	13 842 798

Property rates are levied monthly on a fair market value on properties and are payable the 1st working day of each month. Property owners can request to pay in full for the year in which case the amount has to be paid on or before 30 September, whereby the owner will qualify for a 5% discount on his property rates if the property owner pays the outstanding amount in full. Interest is levied at a rate determined by council on outstanding rates amounts.

A rate in the rand for domestic and business properties of R 0.008785 was charged on the total market value.

Properties used for domestic purposes and consisting of both land and improvements are subject to a R20,000 valuation reduction. There are also different rebates and phased in tariffs for different sectors of the community.

Rebates can be defined as any income that the Municipality is entitled by law to levy, but which has subsequently been forgone by way of rebate or remission.

Valuations

Residential	743 876 265	743 876 265
Commercial	3 267 337 357	3 267 337 357
State	78 213 730	78 213 730
Municipal	34 243 565	34 243 565
Exempted valuations	33 102 037	33 102 037
	4 156 772 954	4 156 772 954

Valuations on land and buildings are performed every four years in terms of the Municipal Property Rates Act. The last general valuation came into effect on 1 July 2009. No interem valuations were performed during the year.

The new general valuation will be implemented on 01 July 2014.

22. Service charges

24. Government grants and subsidies (continued)

Equitable Share

In terms of the Constitution, this grant is used to subsidise the provision of basic services to indigent community members.

Municipal infrastructure grant (MIG)

Balance unspent at beginning of year	6 921 538	2 435 765
Current-year receipts	17 370 000	20 977 000
Conditions met - transferred to revenue	(17 025 854)	(16 491 227)
Unspent 2011/2012 transfer to Equitable Share	(2 436 000)	-
	4 829 684	6 921 538

MIG is used to construct roads and other infrastructure assets.

Municipal systems infrastructure grant (MSIG)

Current-year receipts	890 000	1 200 000
Conditions met - transferred to revenue	(890 000)	(1 200 000)
	-	-

MSIG is used to build capacity in the district and local municipalities to ensure that the new development system of local government is fully implemented.

Financial management grant (FMG)

Current-year receipts	1 650 000	1 500 000
Conditions met - transferred to revenue	(1 650 000)	(1 500 000)
	-	-

This grant was used to promote and support reforms to financial management practices, including the modernisation of budgeting, financial management, accounting, monitoring systems and implementing of the Municipal Finance Management Act.

Expanded Public Works Programme (EPWP)

Current-year receipts	1 000 000	1 000 000
Conditions met - transferred to revenue	(1 000 000)	(1 000 000)
	-	-

The EPWP grant is mainly used for cleaning and security.

Cooperative Governance and Traditional Affairs

Current-year receipts	8 783 755	4 137 368
Conditions met - transferred to revenue	(8 783 755)	(4 137 368)
	-	-

The housing grant was used for the project in Lennertsville.

Kai !Garib Local Municipality

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Certification of Remuneration of Councillors

31. Remuneration of councillors

Mayor	682 558	682 747
Mayoral Committee Members	566 981	574 500
Speaker	550 214	573 540
Councillors	2 904 223	2 967 237
	4 703 976	4 798 024

In-kind benefits

The Mayor and Speaker of the municipality serve in a fulltime capacity. Each is provided with an office at the municipal buildings.

The Mayor is provided with secretarial support at the cost of the Council.

The Mayor has use of Council owned vehicles for official duties.

The Mayor and the Speaker has use of Council owned laptops.

Councillor remuneration is in line with the upper limits as per the Government Gazette.

32. Income from agency services

Driver licenses applications and renewals	774 095	425 086
---	---------	---------

33. Debt impairment

Consumer debtors	6 077 470	12 429 217
------------------	-----------	------------

IAS 39 tells us that an impairment of a financial asset is calculated as being the difference between the expected future cash flows and their present (discounted) value. This means another discounting calculation, distinct from any discounting calculations that may have been required to determine fair value at initial recognition.

An impairment calculation is forward-looking and the municipality therefore used the number of days that the particular consumer debtor is still expected to be outstanding based on the best information available at year-end.

34. Interest received

Interest revenue

Other financial assets	185 927	17 105
Interest charged on trade and other receivables	7 907 071	7 481 481
	8 092 998	7 498 586

The amount included in Investment revenue arising from exchange transactions amounted to R 7 907 071.

The amount included in Investment revenue arising from non-exchange transactions amounted to R 185 927.

35. Depreciation and amortisation

Property, plant and equipment	35 997 585	36 107 323
Intangible assets	22 395	4 933
	36 019 980	36 112 256

49. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

Risk management plans are developed and monitored to ensure councils the policies and systems are reviewed regularly to reflect changes in the municipalities operations.

The accounting officer provides written principles for overall risk management, as well as written policies covering specific areas, such as interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2014	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Borrowings	1 585 490	5 764 724	638 921	-
Trade and other payables	34 010 874	-	-	-
Finance leases	1 089 110	1 333 179	-	-

At 30 June 2013	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Borrowings	1 657 478	5 938 613	2 050 523	-
Trade and other payables	45 401 630	-	-	-
Finance leases	1 324 126	2 256 099	-	-

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors.

Financial assets exposed to credit risk at year end are shown in the relevant note for cash and cash equivalents, trade receivables and other financial assets.

Financial instrument	2014	2013
Consumer debtors	21 422 705	19 574 647
Bank	664 261	(297 853)
Old mutual	66 978	66 978

Market risk

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

(Registration number NC082)

Unaudited Annual Financial Statements for the year ended 30 June 2014

Certification of Remuneration of Councillors

50. Going concern

The unaudited annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality and that the municipality is very reliant on grants from Treasury. Funding will be received from National Treasury as long as the municipality submit their reports on time. The collection of outstanding consumer debtor accounts are also a priority for the next twelve months.

51. Events after the reporting date

a New valuation roll was compiled during the 2013/14 financial year that came into affect on 1 July 2014. The valuations of the municipal properties increased with R 3,076,421,046. That will retrospectively increase the billable property rates with approximately with R10,000,000.

52. Unauthorised expenditure

Opening balance	99 491 898	94 329 488
Additions during the year	51 076 008	5 162 410
Closing balance	150 567 906	99 491 898

53. Fruitless and wasteful expenditure

56. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the unaudited annual financial statements.

Deviations made for the year are as follows:

Number	Date	Vendor	Amount	Reasons for the Deviation from the Supply Chain Management Regulations
DEV001	07 September 2013	Bell Equipment Sales SA Ltd	5 244	Only 1 quote could be obtained as the required parts are only available from that manufacturer.
DEV002	16 July 2013	Gordonia Verkoelingsdienste BK	10 774	Repairs: Estimates could not be provided prior to commencement of repairs, making it impractical to obtain multiple quotes.
DEV003	17 July 2013	NC Electrowinding	21 047	Repairs & Replacement of Faulty Parts: Estimates could not be provided prior to commencement of repairs, making it impractical to obtain multiple quotes.
DEV004	17 July 2013	Upington Alternators & Rewinds CC	2 896	Strip, Inspection, Repairs & Replacement of Faulty Parts: Estimates could not be provided prior to commencement of repairs, making it impractical to obtain multiple quotes.
DEV005	19 July 2013	Kamas Staalwerke	11 796	Only 1 quote could be sourced.
DEV006	22 July 2013	W Fortuin t/a Morning Glory Security	427 800	Extension of contract with the current service provider: There's a pending tender process for the appointment of a service provider for the security services and the municipality cannot shoulder the risk of operating without a security service.
DEV007	23 July 2013	Oranje Nissan	16 046	The required parts are only available from the manufacturer. Only 1 quote could be obtained.
